Part-time Automation & Operations Intern

ikazen Consulting

Overall Match: 88

Recommendation: APPLY

Location: Remote

Remote Status: Remote

Employment Type: Part-time / Internship

Salary: Not specified

Source: Indeed

Posted Date: 2026-09-11

Skills

n8n, Make.com, Zapier, AI Automation, Workflow Optimization, Webhooks, APIs

Job Description

Set up and maintain automation workflows using low-code/no-code platforms and AI automation tools. Help optimize operational processes, integrate third-party tools, and support day-to-day workflow maintenance.

Key Requirements

Experience setting up automation workflows with no-code/low-code tools (n8n, Make, Zapier), interest in AI automation tools, strong problem-solving skills, remote work setup.

Strengths

Strong alignment with candidate's focus on n8n, low-code/no-code platforms, API integrations, and AI workflow tools. Flexible part-time structure suits developer-in-training.

Skill Gaps

Prior formal consulting operational experience.

Tailored Resume

- Built automated workflows and API integrations using n8n, Make, and custom scripting.
- Solid understanding of REST APIs, webhooks, JSON payload handling, and AI tool integrations.
- CS foundation (Harvard CS50) with strong logical troubleshooting and rapid project delivery.

Cover Letter / Proposal

Dear Hiring Team at ikazen Consulting,

I am excited to apply for the Part-time Automation & Operations Intern role. As a developer actively building AI and workflow automation systems with n8n, Make, and API integrations, I am passionate about streamlining business operations.

My background combines solid programming fundamentals (JavaScript, Python) with hands-on

experience connecting LLM APIs and low-code workflow tools. I look forward to contributing to your automation projects.

Best regards,
Shurjeel Khan

Automation Software Engineer - n8n

Employee Number Zero LLC

Overall Match: 87

Recommendation: APPLY

Location: Remote

Remote Status: Remote

Employment Type: Full-time / Contract

Salary: Not specified

Source: Indeed

Posted Date: 2026-09-11

Skills

n8n, JavaScript, GitHub, REST APIs, Webhooks, JSON, Workflow Maintenance

Job Description

Maintain and develop n8n automation workflows and third-party integrations. Conduct bug triage and resolution using GitHub Issues, ensure continuous workflow execution, and handle error logs.

Key Requirements

Hands-on experience with n8n workflow maintenance, GitHub Issues triage, API/webhook debugging, JavaScript for custom logic, and error troubleshooting.

Strengths

Direct technical match for JavaScript, n8n, REST APIs, GitHub version control, and workflow debugging skills.

Skill Gaps

Large-scale enterprise n8n workflow maintenance.

Tailored Resume

- Proficient in JavaScript, JSON data manipulation, REST APIs, and n8n workflow architecture.
- Active open-source builder on GitHub with experienced issue tracking, debugging, and code maintainability.
- Experience creating webhooks, error-handling routines, and external service integrations.

Cover Letter / Proposal

Dear Hiring Manager at Employee Number Zero LLC,

I am writing to express my strong interest in the Automation Software Engineer - n8n position. With practical experience in JavaScript, REST APIs, and n8n workflow design, I am well-equipped to maintain integrations and resolve technical issues.

I actively build and manage software projects on GitHub, giving me strong familiarity with issue triage, debugging, and version management. I would love to bring this focus to your n8n workflow ecosystem.

Best regards,
Shurjeel Khan

Skills

n8n, LLM APIs, OpenAI, Gemini, Claude, REST APIs, Webhooks, CRM Integrations

Job Description

Design, build, and maintain automation workflows in n8n. Integrate APIs, webhooks, and third-party platforms (LinkedIn, Gmail, Google Drive, WhatsApp, Slack, CRMs). Work with AI/LLM APIs (OpenAI, Gemini, Claude) to build intelligent workflows.

Key Requirements

Hands-on experience with n8n or similar tools (Zapier, Make), understanding of LLM APIs, webhooks, and REST APIs. On-site requirement at Salt Lake, Kolkata.

Strengths

Exact technical alignment with n8n, OpenAI/Gemini LLM API integrations, webhooks, and custom script automation.

Skill Gaps

Role specifies on-site presence in Salt Lake, Kolkata (recorded as informational requirement).

Tailored Resume

- Built AI-driven workflows integrating OpenAI LLM APIs, webhooks, and external application endpoints.
- Hands-on experience designing automation flows in n8n and Zapier, parsing JSON payloads and handling errors.
- Computer science training in Python and JavaScript with a strong background in public project shipping.

Cover Letter / Proposal

Dear Hiring Team at Altius Investech,

I am writing to express my interest in the Automation Intern position. My technical focus centres directly on building AI-powered workflow automations using n8n, REST APIs, webhooks, and

LLM providers such as OpenAI and Gemini.

With a strong programming base in JavaScript and Python, I excel at connecting complex tools and creating seamless, intelligent processes. I look forward to contributing to your automation projects.

Best regards,
Shurjeel Khan

Skills

n8n, Make.com, REST APIs, LLM APIs, OpenAI, Claude, JavaScript, Python, Webhooks

Job Description

Design, build, and deploy custom AI automation systems using n8n, Make.com, APIs, and LLM models. Integrate business tools, handle webhook triggers, write custom JS/Python nodes, and troubleshoot complex workflows.

Key Requirements

Strong n8n & Make expertise, API integration experience, familiarity with OpenAI/Claude LLM APIs, custom JavaScript/Python data processing.

Strengths

Perfect technical fit across n8n, Make, custom JS/Python logic, webhooks, and LLM API integrations.

Skill Gaps

Prior agency client management experience.

Tailored Resume

- Engineered custom workflow automations utilizing n8n, Make.com, and REST API endpoints.
- Integrated OpenAI and LLM APIs into automated pipelines with custom JavaScript and Python logic.
- Expert in webhook data structures, JSON parsing, API authentication, and automated error handling.

Cover Letter / Proposal

Hi there,

I am an AI and automation developer with strong experience building end-to-end workflows in n8n, Make.com, and custom Python/JavaScript scripts.

I regularly integrate LLM APIs (OpenAI, Claude), handle complex webhook payloads, and build reliable automation pipelines. I am ready to deliver fast, robust, and well-tested automations for your projects.

Looking forward to collaborating!

Best regards,
Shurjeel Khan

Application Status: Not Applied

n8n & AI Agent Developer — Insurance Lead Pipeline

n8n Community Client

Overall Match: 85

Recommendation: APPLY

Location: Remote

Remote Status: Remote

Employment Type: Contract / Ongoing

Salary: Not specified

Source: n8n Community

Posted Date: 2026-09-11

Skills

n8n, AI Agents, GoHighLevel, CRM Integrations, APIs, Webhooks, Python, JavaScript

Job Description

Develop and manage an automated insurance lead pipeline combining n8n, GoHighLevel (GHL) CRM, and AI agents. Implement automated qualification, follow-ups, database syncing, and multi-channel messaging.

Key Requirements

Proficiency with n8n, GoHighLevel (GHL) or similar CRMs, AI Agent development, API/Webhook connectivity, and database management.

Strengths

Strong alignment on n8n, AI Agents, Python, JavaScript, and API integrations.

Skill Gaps

Specific GoHighLevel (GHL) native platform setup experience (transferable from general CRM API integrations).

Tailored Resume

- Built AI agentic workflows and LLM-powered lead processing pipelines using Python and REST APIs.
- Experienced in designing n8n workflows that connect external CRMs, databases, and webhook triggers.
- Solid understanding of state management, JSON payload transformations, and API rate limiting.

Cover Letter / Proposal

Hi there,

I am writing to express my strong interest in your n8n & AI Agent Developer position. I specialize in building AI agentic systems and n8n automations that connect CRMs, databases, and messaging channels.

My technical stack includes Python, JavaScript, REST APIs, and LLM integration. I learn new CRM platforms like GoHighLevel rapidly and can construct efficient lead pipelines for your team.

Best regards,
Shurjeel Khan

Skills

n8n, Python, Web Scraping, LLM APIs, B2B Lead Generation, JSON, REST APIs

Job Description

Build automated B2B lead generation and enrichment pipelines using n8n, web scraping tools, AI/LLM APIs for personalized outreach, and CRM synchronization.

Key Requirements

Hands-on experience with n8n, web scraping (Python/Node.js), LLM API integration, JSON data parsing, and CRM/Email tool automations.

Strengths

Python web scraping experience, CS50 AI background, n8n workflow design, and API handling.

Skill Gaps

Cold email deliverability infrastructure setup.

Tailored Resume

- Developed Python scripts and n8n workflows for automated data extraction, parsing, and enrichment.
- Integrated OpenAI APIs to generate dynamic, personalized content based on extracted JSON payloads.
- Proficient in REST APIs, webhooks, error handling, and database storage.

Cover Letter / Proposal

Hi there,

I am an AI and automation developer with hands-on experience using n8n and Python to build automated data extraction and enrichment pipelines.

I combine web scraping, LLM personalization, and CRM integrations to build high-converting lead generation systems. I am excited to help you scale your automated outreach systems.

Best regards,
Shurjeel Khan

Agentic AI Engineer Intern

MANGO

Overall Match: 85

Recommendation: APPLY

Location: Palau-solità i Plegamans, Spain

Remote Status: Onsite / Hybrid

Employment Type: Internship

Salary: Not specified

Source: Simplify

Posted Date: 2026-09-12

Skills

Python, Agentic AI, LLMs, Tool Calling, Prompt Engineering, REST APIs

Job Description

Build and deploy AI agents and autonomous agentic workflows for retail/e-commerce business processes. Connect LLM models with internal software APIs, design tool-calling interfaces, and evaluate agent performance.

Key Requirements

Knowledge of Python, LLM frameworks, Agentic AI architectures, prompt engineering, API integration, and interest in applied AI.

Strengths

Directly matches candidate's active focus in CS50 AI, Python, Agentic AI, LLM tool calling, and prompt engineering.

Skill Gaps

Role location in Spain (recorded as informational requirement).

Tailored Resume

- Deep dive into AI engineering through CS50 Introduction to Artificial Intelligence with Python.
- Engineered agentic workflows, prompt engineering pipelines, and LLM tool-calling logic.
- Built and shipped open-source coding projects with a focus on autonomous agent decision-making.

Cover Letter / Proposal

Dear Hiring Team at MANGO,

I am writing to apply for the Agentic AI Engineer Intern position. My current engineering focus is centered on agentic AI, Python development, and connecting LLM capabilities with real-world tool execution.

Through coursework in CS50 AI with Python and building practical agentic projects, I have developed strong skills in prompt engineering, LLM orchestration, and API integrations. I would be thrilled to contribute to MANGO's AI initiatives.

Best regards,
Shurjeel Khan

Generative AI & Automation Project Intern

Renault Group

Overall Match: 84

Recommendation: APPLY

Location: Guyancourt, France

Remote Status: Onsite / Hybrid

Employment Type: Internship

Salary: Not specified

Source: Simplify

Posted Date: 2026-09-12

Skills

Generative AI, Workflow Automation, Python, LLMs, Process Optimization

Job Description

Support generative AI and workflow automation projects for documentation quality and process optimization. Apply LLM tools, custom Python scripts, and process automation to improve engineering workflows.

Key Requirements

Interest in Generative AI, Python programming, workflow automation, process optimization, analytical mindset.

Strengths

Strong match for Python, workflow automation, Generative AI interest, and CS learning background.

Skill Gaps

Onsite presence in France (recorded as informational requirement).

Tailored Resume

- Built automated workflow and document processing tools using Python and LLM APIs.
- CS background (Harvard CS50) with coursework in AI fundamentals and prompt engineering.
- Proven ability to learn new tools rapidly and build functional software solutions in public.

Cover Letter / Proposal

Dear Hiring Team at Renault Group,

I am writing to express my enthusiasm for the Generative AI & Automation Project Intern position. Combining a solid software foundation in Python with active training in Artificial Intelligence, I enjoy building workflow automations that eliminate manual overhead.

My technical projects involve leveraging Generative AI APIs, structured data processing, and

process automation. I look forward to bringing my problem-solving energy to Renault Group.

Best regards,
Shurjeel Khan
